

Please amend claim 2 as follows:

a<sup>1</sup>

2. (amended) The recombinant adenovirus of claim 1, wherein said adenovirus can achieve [CAR]~~coxsackievirus and adenovirus receptor-independent~~ gene transfer.

---

In claim 6, line 1, please replace "5" with --1--.

In claim 7, line 1, please replace "5" with --1--.

Please amend claim 9 as follows:

---

a<sup>2</sup>

9. (amended) The recombinant adenovirus of claim 1, wherein the adenoviral vector encoding said adenovirus further comprises a [therapeutic] ~~herpes simplex virus-thymidine kinase~~ gene.

---

In claim 11, line 4, please replace "10" with --9--.

Please amend claim 16 as follows:

---

Sub C2

a<sup>3</sup>

16. (amended) A method of increasing the ability of an adenovirus to transduce [a] ~~primary tumor~~ cells, comprising the steps of:

---

Q<sup>3</sup> modifying the fiber gene [in the HI loop domain of the fiber knob] of said adenovirus by introducing a ligand into the HI loop domain of the fiber knob; and

transducing said primary tumor cells with said adenovirus, wherein said transduction results in enhanced gene transfer to said tumor cells.

---

In claim 18, line 1, please replace "17" with --16--.

In claim 19, line 1, please replace "17" with --16--.

Please amend claim 22 as follows:

---

Q<sup>4</sup> 22. (amended) The method of claim [21] 16, wherein said tumor cell is selected from the group consisting of [*in vitro*, *in vivo* and *ex vivo*.] cancer ascite samples and primary tumor explants.

---

Please cancel claims 5, 10, 17 and 21.
